PROFILE

Certified Kubernetes Administrator (CKA) with 2+ years of experience in Platform Engineering, Kubernetes administration, CI/CD automation, and containerized infrastructure. Experienced in managing mission-critical, air-gapped environments, building production-grade deployment pipelines, and automating infrastructure using Python, Bash, and Ansible.

SKILLS

Tools : Kubernetes(CKA), Docker, Ansible, ElasticSearch, GitLab, Linux (RedHat, Ubuntu), Postgres, Helm, Kustomize.
Technical : Containerization, Orchestration, CI/CD & Automation, Monitoring & Logging , Development & APIs Databases, Linux Administration.

EXPERIENCE

Project Engineer (DevOps & Python) | CDAC (Centre for Development of Advanced Computing)
(Apr 2024 – Present | New Delhi , India)

- Worked on a mission-critical government project hosted in an air-gapped data center featuring DC–BCP–DR architecture, ensuring high availability, business continuity, and disaster resilience.
- Designed and maintained GitLab CI/CD pipelines supporting 20+ microservices across Development, Staging and Production environments, reducing deployment time by 40%.
- Automated workflows for migrating Python Application services from DC-DR using Bash scripting and Ansible reducing manual intervention by 50%.
- Deployed services in Docker Swarm and Kubernetes; integrated Elasticsearch for centralized logging
- Elasticsearch – (Established and Maintained 3 Elastic Clusters in DC ,BCP , DR - High Availability Architecture)

Programmer Analyst Trainee (Data Warehousing) | Cognizant Technology Solutions
(Feb 2022 – Sep 2022 | Pune, India)

- Worked on ETL and Data Warehousing concepts. Used Informatica and Stibo for data integration and transformation.

CERTIFICATION

- Certified Kubernetes Administrator (Certificate Id – LF-noulp0s4su)

EDUCATION

- B.Tech, (Computer Science Engineering) , Shankaracharya University, Bhilai 2018 – 2022
- PG Diploma in Big Data Analytics (PG-DBDA), Sunbeam Pune, Jul 2023 – Feb 2024

PROJECTS

• Developed a production-ready CI/CD pipeline using GitLab CI/CD, integrating SAST, DAST, Docker image builds, vulnerability scanning, and caching to optimize build performance and deployment efficiency.
• Built a secure multi-tenant Kubernetes platform implementing RBAC, Network Policies, Resource Quotas, LimitRanges, Namespaces, and Pod Security Standards (PSS) for tenant isolation and resource governance.
