Top Skills

Production Deployment
Docker
Elastic Stack (ELK)

Certifications

Certified Kubernetes Administrator

John Mathews

DevOps Engineer | Certified Kubernetes Administrator | Elasticsearch | Docker | Linux | Platform Engineer
New Delhi, Delhi, India

Summary

DevOps & Python Engineer with 1+ year of experience delivering automation-driven, containerized, and production-ready solutions. Skilled in Python development, Bash scripting, Docker, Docker Swarm, and Elasticsearch, with recent strong hands-on expertise in Kubernetes, successfully designing, deploying, and managing production-grade clusters to enhance scalability, reliability, and speed of delivery.

Proven track record in building CI/CD pipelines, hosting Docker images on Nexus, and deploying services across development, staging, and production environments. Experienced in secure, high-availability architectures, having worked on a government project at a client location within an air-gapped data center featuring DC-BCP and DR setup to ensure business continuity and disaster resilience.

I thrive on solving complex infrastructure challenges, automating workflows, and bridging the gap between development and operations to deliver business value faster.

Core Skills:
Python Development & Automation
Kubernetes (Production Implementation)
Docker, Docker Swarm, Nexus Repository Management
Elasticsearch
CI/CD Pipeline Design & Implementation
Bash Scripting & Linux Administration
DC-BCP & DR Architecture in Air-Gapped Environments
Red-Hat/Linux

Experience

Centre for Development of Advanced Computing (C-DAC)
Project Engineer

April 2024 - Present (2 years 4 months)
Pune, Maharashtra, India
